

EFFICIENT COOKSTOVES IN RWANDA, AFRICA

Providing improved cookstoves results in positive impacts beyond efficient cooking

Around the world, communities in Rwanda and other developing countries face deadly impacts from inefficient cookstoves that causes up to 4 million premature deaths per year. Providing these communities with efficient cookstoves can greatly improve the quality of women & equality, health and the environment.

WOMEN & EQUALITY

**4HRS
saved**

per day vs the typical 5 hours women in Rwanda spend collecting fuel.

This allows them to have more time with their families and pursue paying jobs.

HEALTH

Using efficient cookstoves reduces:

97%
PM 2.5

96%
CO emissions

This greatly improves Household Air Pollution which is the 2nd leading cause of death behind malnutrition.
